

SCREEN | NOIR |

FEATURES

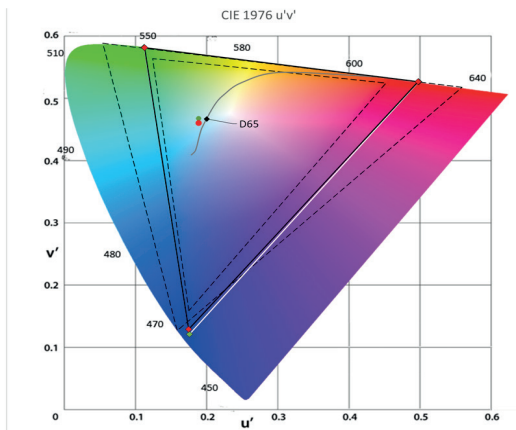

- High Contrast
- Gain ~0.42
- Fire protection class B1
- Compatible with full white frames
- Can be produced to specific dimensions as well
- Ambient light absorption

An optimized design of the Screen Noir meets the most demanding requirements in the field of projection. The new grey projection screen fabric impresses with a high intensivity through ambient light absorption and offers high-contrast images even in bright surroundings. Especially in the segment of multiscreen projection, the new Screen Noir fabric performs with its wide viewing angle.

SCREEN NOIR 50

WHITE SCREEN

Screen Noir 50 is an optimal compromise between Screen Noir 100 and a white projection fabric.

The grey projection surface ensures an excellent brightness and vivid colors despite ambient light.

Screen Noir 50 delivers spectacular images for an immersive projection experience.
